PROFESSIONAL SUMMARY

Data Analyst with hands-on experience delivering ETL pipelines on 180K+ record datasets and identifying 2M+ dollars in quantified business risk and savings across supply chain and operational domains. Seeking a data analyst or BI role to apply SQL, Python, and Power BI to decisions that move business metrics at scale.

TECHNICAL SKILLS

- **Data & Analytics:** SQL, Python (Pandas, NumPy), Power BI, Microsoft Excel, ETL Pipelines, Star Schema Data Modeling, Data Governance.
- **Cloud & Tools:** Google BigQuery, Amazon Web Services (AWS), Google Sheets, Google Apps Script, Git/GitHub, Jupyter Notebook.
- **Methods:** Root Cause Analysis, KPI Dashboard Design, S-Curve Modeling, Geospatial Analysis.

PROFESSIONAL EXPERIENCE

Founder & General Manager

Dec 2023 – Present

Techno Club Workspace — Mansoura, Egypt

A tech hub and co-working infrastructure providing flexible workspaces and dedicated meeting rooms for corporate teams and instructors.

- Direct enterprise operations and data-driven B2B client acquisition, leading a cross-functional team of 6 employees to accelerate workspace growth.
- Analyzed 3 years of historical operational, occupancy, and customer financial datasets using Python and SQL to model an optimal B2B business model pivot, driving a **40% revenue increase** and a **20% reduction in operational expenses**.
- Invented and deployed a centralized cloud-based booking infrastructure using Google Apps Script, migrating operational tracking to **Google BigQuery** to scale data operations and **eliminate 80% of scheduling conflicts**.
- Integrated automated management reporting workflows and live KPI tracking dashboards, reducing executive administrative overhead by 15+ hours weekly.

Data Analyst Intern

Mar 2026 – May 2026

National Telecommunication Institute (NTI) — Mansoura, Egypt

- Engineered robust ETL pipelines on **telecom operational datasets** using SQL and Python, establishing strict Data Governance protocols to deliver structured Star-Schema models.
- Developed advanced business metrics and interactive KPI tracking dashboards across large-scale data initiatives, eliminating critical data silos and reporting bottlenecks.
- Delivered 3 interactive Power BI dashboards tracking operational KPIs on-site at the NTI facility, presenting data-driven findings directly to senior program stakeholders and technical mentors.

TECHNICAL PROJECTS

- Served as the **Lead Sales & Profitability Analyst** within a 5-member team; played a pivotal role in securing the **"Best Graduation Project"** award for the NTI Data Analysis track.
- Engineered a high-performance **Star Schema** data model to process **180k+ records** and 53 complex variables, optimizing the analysis of \$36.78M in total sales.
- Developed sophisticated SQL queries utilizing **window functions, CTEs, and multi-table joins** to diagnose a 50% profit gap and identify \$3.73M in lost revenue due to inefficient discount policies.
- Discovered a **10%–13% "Golden Ratio"** for discounts through impact analysis, proving that higher discounts (50%) failed to boost volume; formulated a 5% discount cap policy, successfully cutting unnecessary expenditure to yield **\$2.2M in net profit savings**.
- Uncovered a **100% correlation** between high-demand product fraud and "Bank Transfer" payments, identifying a security loophole responsible for **\$20K+ in fictitious revenue** and recommending immediate payment-gateway authentication fixes.
- Performed **Geographic Price Sensitivity** analysis to reallocate marketing budgets from high-discount/low-revenue markets (Central Asia) to premium markets (Northern Europe), maximizing net profit margins.

Chinook Strategic Business Intelligence Project

Apr 2026

- Diagnosed systematic "Growth Stagnation" for a digital storefront with a fixed base of 59 global customers and a heavy 37% revenue dependency on a single music genre (Rock), transforming raw requirements into an actionable data roadmap.
- Formulated a targeted, commission-based sales structure to activate historical "Zero-Sales Assets" and bypass the rigid 7-invoice sales ceiling.
- Mapped high-performing international markets using geospatial data within Power BI to optimize global marketing budget allocation.
- Architected an executive-level Power BI dashboard following data visualization best practices to track user acquisition rates and sales performance.

AI-Driven Solar Panel Tracking Model

Aug 2025

- Built a Python machine learning model achieving **84% dual-axis positioning alignment accuracy** in simulated environments, optimizing energy capture based on dynamic solar irradiance.
- Reduced projected misalignment power losses significantly compared to traditional fixed-tilt baselines by processing real-time simulated sensor inputs.

EDUCATION & RESEARCH

MSc Computer Science Candidate

Expected May 2027

Mansoura University, Egypt

- **Postgraduate Preparatory Coursework in Computer Science** (Completed 2025).

Bachelor of Computers and Information (Artificial Intelligence Dept.)

2020 – 2024

Mansoura University, Egypt

CERTIFICATIONS & LANGUAGES

- **Certifications:** Google Advanced Data Analytics — *In Progress (Expected 2026)*, Data Analytics Essentials (Cisco Networking Academy), Business Development
- **Languages:** Arabic (Native), English (Professional Working Proficiency).
